How to live for 200 years !

With a natural product extracted from plants !

Living life, other than in a wheelchair or bed !
Enjoying one's retirement in good health for as long as possible !
See children and even great grandchildren growing up,
Living life, other than in a wheelchair or bed !

HOW IS THIS POSSIBLE ?

A REVOLUTIONNARY PATENTED PRODUCT COINED "TELOBOOSTER[®]" MAKES SUCH A MIRACLE IN YOUR HANDS !

Telomerase is the main agent to protect telomeres from shortening during cell division.

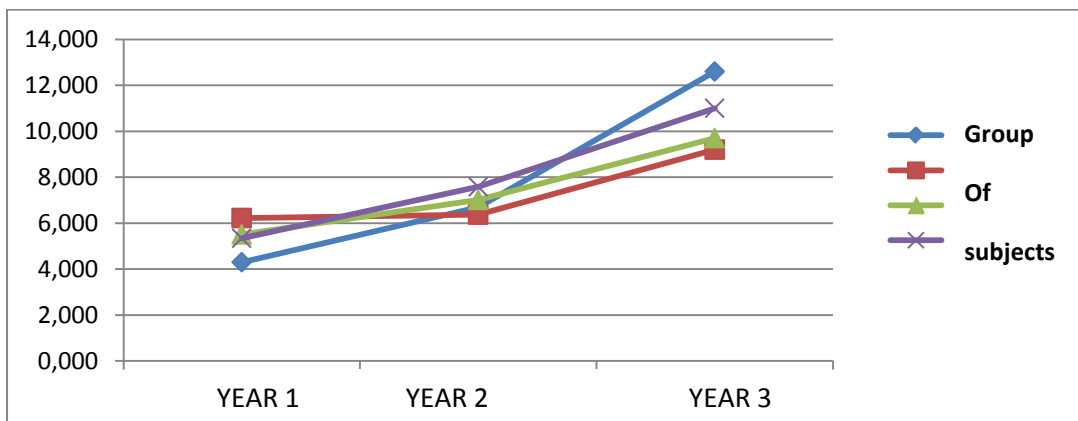

Recent tests, especially on mice, have shown the effectiveness of certain molecules extracted from plants, while determining that these plants have no carcinogenic effect.

Our active product protects and promotes telomere elongation, hence the name TELOBOOSTER[®]

Scientific evidence has established that the TELOBOOSTER[®] increase the length of telomeres throughout the aging in human cells.

It is important to note that recent studies have correlated the likelihood of developing certain types of cancer and the presence of short telomeres in humans. Most of all the TELOBOOSTER[®] helps protect telomeres, thereby increasing telomere length. According to this work, TELOBOOSTER[®] diminishes the chance of certain types of cancer.

Chart below: results over a 3 year clinical follow up: all human subjects increased their telomere length.

X axis: years - Y axis : absolute telomere length (in kbp)

Richard Catérini eng., PhD, Dr Hab.
